

## Pushbutton Switch

# A16

### Mounting Aperture of 16 mm

- Modular construction (Pushbutton + Case + Lamp + Switch)
- Wide Variety of Control and Signal Devices: Lighted, Non-Lighted, and Buzzer (Refer to page 47.)
- UL and CSA approved.
- Conforms to EN60943-5-1, IEC947-5-1
- Quick and easy assembly, snap-in Switch.
- Wide range of switching capacity from standard to microload
- High reliability, IP65
- Short mounting depth, less than 28.5 mm below panel

## Ordering Information

## Operation

### ■ Terminal Arrangement

- The voltage-reduction circuit is built in.

### Screw-Less Clamps and Voltage Reduction Unit

- Voltage-reduction lighting models with Screw-Less Clamps (A16L-□T1-2S, A16L-□T2-2S) incorporate voltage-reduction circuits.

### Wiring for Screw-Less Clamps

#### Mounting Wires

- Strip a length of 10 mm off the end of the wire (allowable range:  $10 \pm 1$  mm).
- Bunch wire strands together and straighten them.
- Insert the wire into the insertion hole while pressing the release button at the side of the hole. (Using a precision screwdriver is recommended.)

- Let go of the release button to lock the wire into place.

- After locking, pull on the wire gently to confirm that it is securely locked.

#### Removing Wires

Remove wires by pulling them while pressing the release button.

**Note:** When reusing wires that have already been locked, cut off the end of the wire and strip the wire again before using.

### ■ Mounting Precautions

- The mounting panel thickness must be 0.5 to 3.2 mm.
- The mounting ring must be tightened to a torque 0.29 to 0.49 N·m.
- The mounting hole must be cut out in the way described previously. The dimension A is the length required for removing the Switch when it is in the mounted state. If Switches are mounted side-by-side separated by less than the specified distance, it may not be possible to remove the Switch.
- Be sure to mount the Case to the Switch with the correct orientation. Mount with the • mark on the Case facing in the same direction as the side of the Switch with the direction arrow or the word TOP.

- When using stranded wires with the Screw-Less Clamp, wrap the ends of the wires together first.
- When wiring, insert the wires until they come into contact with something. After wiring, pull on the wires to check that they are secure.
- After wiring, ensure that continuous pressure is not applied to the terminals.
- Be sure to perform wiring correctly. Refer to internal connections diagrams and check the terminal numbers before wiring.

## Installation

### ■ Panel Mounting

After mounting the Pushbutton Unit (i.e., the Pushbutton and the Case) to the panel, snap in the Switch Unit (i.e., the Switch and the Lamp) from the back of the panel.

#### Mounting to the Panel

Insert the Pushbutton Unit into the front of the panel, and fix the lock ring and mounting nut from the terminal side.

Make sure that the lock ring is aligned with the thread of the Case and the edge of the lock ring is touching the panel.

Tighten the mounting nuts to a torque of 0.29 to 0.49 N·m.

The maximum tightening torque is 0.49 N·m.

#### Mounting the Switch Unit

Snap on the Switch Unit to the Pushbutton Unit.

Make sure that the Switch Unit has the correct orientation when snapping it onto the Case. Align the • mark on the Case with the groove between the case guards on the NC terminal side of the Switch Unit in the way shown below, and push the Switch Unit into the Case until it clicks into place. Confirm that the Switch Unit is securely in place before using.

#### Removing the Switch Unit

Grip the part between the Switch holder of the Case and the Switch Unit using the A16Z-5080 Extractor, and pull to remove the Switch Unit.

##### • 16-mm Models

##### • A16-P Models (with PCB Terminals)

The Switch Unit can be mounted or dismounted by simply opening or closing the lever.

## ■ Mounting and Replacing the Pushbutton

### Removing and Mounting the Pushbutton

1. Remove the Pushbutton as shown in the following diagram. If the Pushbutton cannot be removed by hand, use the A3PJ-5080 Extractor.

2. To attach the Pushbutton, push until it clicks into place.

### Removing the Lamp

#### Removing from the Pushbutton End

#### Removing from the Switch End

The Lamp can be removed by hand once the Switch is removed using the A16Z-5080 Extractor.

### Installing the Lamp

When mounting the Lamp, make sure it is facing the direction shown in the following diagram. Insert the Lamp while matching the protruding part of the Lamp and the small guides on the outer surface of the Case.

The Lamp can be mounted from the Pushbutton end by using the A16Z-5080 Extractor. The lamp can be mounted by following the opposite procedure for removing the Lamp.

### Mounting the A16Z Dust Cover

1. Separate the Dust Cover into 2 parts: cover A and cover B.
2. Insert the Case into cover B.
3. Mount these parts together onto the panel.
4. From the back of the panel, mount the lock ring and secure with the mounting nut.
5. Insert cover A into cover B. Ensure that the entire perimeter of cover A is securely attached to cover B by pressing in different directions.
6. Mount the Switch Unit to the Case.

**Note:** Recommended panel thickness: 0.5 to 2 mm.

### Mounting the A16Z Switch Guard

1. Insert the Case into the Switch Guard.
2. Mount these parts together onto the panel.
3. From the back of the panel, mount the lock ring and secure with the mounting nut.
4. Attach the Switch Unit to the Case.

**Note:** Recommended panel thickness: 0.5 to 2 mm.
