

SFK

SFK dimensions 106

SFK connectors 107

SFK	radius	a	b	c	d	g	k	p	z	weight kg/m
22 N	100 / 150	40	79	45	85	50	30,5	71	65	3.0
22 H	150 / 200	56	80	60	85	50	30,5	86	90	3.5
22 S	200	78	78	85	85	50	30,5	111	130	5.1
32 N	150 / 200	54	109	60	115	80	30,5	86	90	4.8
32 H	200 / 250	75	110	80	115	80	30,5	106	120	5.3
32 S	300	109	109	115	115	80	30,5	141	175	6.6

The order of length is equal to half the length of travel, plus four times bending radius:

$$L = L_v / 2 + 4 R$$

order example: max. travel distance 3 m, bending radius 100 mm, standard arrangement

SFK 32N / 200	x	1900	/	N/N
type / radius	x	length	/	connectors / arrangement

SFK Characteristics

The chain consists of a rectangular, galvanized steel spiral band and mounted in inner radius is a spring steel band. The SFK offers large usable cross-sections at low external dimensions and optimum line protection. At low cantilever lengths the SFK is ideal for areas with hot chips and sparks.

The temperature range is between -40°C and $+180^{\circ}\text{C}$.

SFK Flanges

Flange N

Standard is the low priced flange N, each with four mounting holes.

order example

SFK 32N	/ 250	x	3000	/ NN	/ h
type	/ radius	x	length	/ flange	/ arrangement

Flange A

With countersunk screws, knurled nuts and angles the standard flange N changes to flange A.

order example

SFK 32N	/ 250	x	3000	/ AA	/ h
type	/ radius	x	length	/ flange	/ arrangement

Flange B

Flange B is connected laterally with angles. The holes of standard flanges N are omitted.

order example

SFK 32N	/ 250	x	3000	/ BB	/ h
type	/ radius	x	length	/ flange	/ arrangement

Scoop mount

Scoop mount complements the diversity of the possible connector types.

order example

SFK 32N	/ 250	x	3000	/ S1	/ h
type	/ radius	x	length	/ flange	/ arrangement

flange N

flange A

flange B
